# Model Choice

For the model choice, we tested with the original data, i.e., four classes without data augmentation.

Model	Accuracy	Precision	Recall	F1-Score	SPEC
DenseNet201	0.9186	0.9187	0.9186	0.9183	0.9707
<b>ResNet50</b>	<b>0.9440</b>	<b>0.9451</b>	<b>0.9440</b>	<b>0.9437</b>	<b>0.9805</b>
VGG16	0.9204	0.9209	0.9204	0.9201	0.9673
VGG19	0.9186	0.9185	0.9186	0.9181	0.9646

# Conclusions

- We proposed a method using ResNet50 Convolutional Neural Network over “Bees vs Wasps” dataset combining techniques such as transfer learning, fine-tuning, and data augmentation which can increase remarkably the model performance.
